College life is an important step stone in the life of any student. The excitement to delve into the newer realms, the expectancy of what lies ahead, and the eagerness to make the most out of college life are rampant in every college student's mind. Added to this is the pressure of internships, extracurricular, and studies. This is the phase when one transitions from a protected environment to a world full of responsibilities. To combat the mounting stress and to fulfill the charge of taking care of oneself, one can resort to practicing yoga routinely. A person is said to have achieved yoga, the union with the Self, when the perfectly disciplined mind gets freedom from all desires, and becomes absorbed in the Self alone." Man is a physical, mental and spiritual being; yoga helps promote a balanced development of all the three.

Why Good Communication Skills? Good communication skills are skills that facilitate people to communicate effectively with one another. Effectual communication engages the choice of the best communications channel, the technical know-how to use the channel, the presentation of information to the target audience, and the skill to understand responses received from others. Self development, interpersonal skills, mutual understanding, mutual cooperation and trust are also important to set a complete channel of most effective and winning communication skills.

Importance of communication skills can never be ignored or neglected. These skills are the key to executing good management skills. With good management skills, you can have a team of members who together create an ambience of open communication, concise messages, probe for clarifications, recognize nonverbal signals, and mutual understanding. Good communication involves a set of complex skills.

The modern world today, calls for high scale effective communication skills in order to win the heavy competition in all spheres of life. For effective communication, a sender transmits his or her message in a clear and organized form to maintain and promote the need and interest of the receivers. Receivers or listeners show interest only if the person communicating is loaded with confidence, gestures and softness. Apart from management professionals, good communication skills are also required at all stages of life.
